01 · VOICE

01

How Daniel Paul Writes

Direct, conversational, confident. Short sentences. One idea per line. No hedging, no hype, no corporate polish.

BANNED PHRASES

`em-dash —` `unlock` `delve` `supercharge` `game-changer` `seamless` `elevate` `leverage`

VOICE RULES

- Write like you talk. Conversational beats polished.
- One idea per sentence. No compound complexity.
- Start sentences with "And" or "But" when it lands right.
- Use specifics. "12 hours a month" beats "many hours".
- P.S. ends every post with a question.

2. **Quiet truth:** "I think no one is saying this out loud."
3. **Pivot:** "But let me tell you something first."
4. **Stat contrast:** "That is [N hours] [every X]. [Consequence]."
5. **Contrarian:** "Everyone says [X]. They're wrong because [reason]."

03 · IDEAL CLIENT

03

SaaS / course creator founder, $500k–$5M revenue

Hangs out at: LinkedIn (daily), Twitter/X, niche Slacks, Indie Hackers

PAIN

- Closing deals, building product, running marketing. Content gets pushed to weekends.
- When they go quiet, the pipeline dries up. They know it and still can't fix it.
- Every "AI content tool" they tried sounded like ChatGPT.

DESIRE

- Post consistently without 12 hours a week of their time.
- AI that writes in their voice, not a generic business voice.
- One system. Not 14 tabs and a Zapier graveyard.

OBJECTION

- "I've tried AI writers. They all sound the same."
- "My voice is too specific. No tool will capture it."
- "I don't have time to set up another system."
